Deliver speculate far beyond expectations

To continuously provide extra value to our customers, suppliers, employees, shareholders and society.

Operate to the high standards

To conduct business fully complying with legal and industrial requirements and at the highest level of ethical behavior in socially responsible and environmental friendly fashion.

IQF FRUITS, VEGETABLES AND HERBS

Pellagic Food Ingredients Pvt Ltd is a leading global supplier of frozen fruit and vegetables processed through Individual Quick Freezing (IQF). Bulk Freezing technology IQF commonly known as Flash freezing is a commercial freezing technology that allows fruits and vegetables to retain its quality and original nutritive value by preventing the formation of large ice crystals in the fruit cells.

Since each whole fruit is individually frozen, particles do not cohere and the final product is not frozen into a solid block.

IQF generally takes place in two stages. In the first stage, the product is partly frozen to a pre-determined point and thereafter, fluidized to a semi-weightless stage by partially suspending it in the air in the second stage. The velocity and pressure of air in the process is adjusted to ensure ultra rapid freezing in IQF form.

Advantages:-

- Eliminate reprocessing and thus considerably reduce the drop loss during thawing & refreezing.
- It also gives a longer shelf life to the fruits and vegetables.
- Convenient to use in various applications like smoothies, Float drinks, Fruit salads etc

Our focus is both on bulk and retail sales. We are also talking contract manufacturing for interested buyers. Over the years, volume of exports of frozen fruits and vegetables from India has increased in manifold. We export to countries such as Portugal, Dubai, France, USA, Japan and many more across the globe. The product basket has also increased to cover more value added products. Currently, the ranges of products exported in this category are:

- Frozen fruit pulps
- Frozen fruits - chunks, cubes, slices and other assortments.
- Frozen mainstream vegetables.

Our strong position enables us to take a great deal of the risks, which worldwide export does entail, away from our customers. On no account will they have to worry about the delivery of the right product with the desired quality at the best time at the most profitable price. Quality of our products is paramount to us but equally so is communication with our customers and suppliers.
